WHY YOU SHOULD ATTEND

Upon completion of this course, you will gain a masterful insight into the best practices of business requirement architecture. As businesses are about solving problems for customers, it is important to match the “needs” and “wants” of the customer by capturing the right business requirements from the start. Learn how to utilise effective business requirement architecture to capture complete business requirements that thoroughly consider every possible user scenario when interacting with the IT system. This course features hands-on activities and live discussions that enable you to immediately put into practice the concepts learned.
