

MASTER CLASS

Mastering Solution Architecture

This Master Class covers solution architecture skill sets, as well as recommended best practices for successful delivery of enterprise business capabilities through IT projects.

TOPICS COVERED

- Solution Architecture Roles and Team Structure
- Components of a Solution
- *Workshop 1: Solution Architect Primary Role at Tinkelman*
- Architect Organization
- *Workshop 2: Solution Architect Organization*
- Solution Architecture Lifecycle
- Managing Solution
- Engagement Model Lifecycle
- Delivering a solution
- Business and Technology Strategy
- *Workshop 3: Presenting Solution Architect*

WHY YOU SHOULD ATTEND

Upon completion of this course, you will gain a masterful insight into solution architecture and the qualities that make the best solution architects. Solution architects are experts in many categories and possess hands-on experience in multiple industries across several disciplines; they can master a variety of hardware platforms, devices, operating systems and databases. Learn the role of successful solution architects who decide which technologies to use and work very closely with developers to ensure proper implementation of IT projects. In addition, you will learn how to be an effective link between the needs of an organisation and its developers, as well as the necessary skill sets and tools to successfully manage, communicate and deliver solutions to stakeholders.
